SANTOSH KUMAR

Systems & Search Engine Architect | kumasantosh947@gmail.com | github.com/santoshkumarvvv

PROFESSIONAL PROFILE

Software Engineer specializing in low-latency in-memory search architectures, deterministic TypeScript & React 19 interfaces, Dart/Flutter mobile engines, and automated GitHub CI/CD pipelines.

CORE COMPETENCIES & TECHNICAL STACK

Languages: TypeScript, JavaScript, Dart, HTML5/CSS3, SQL, Bash
Frameworks & Runtimes: React 19, Next.js, Node.js, Express, Flutter, Vite, Tailwind CSS
Systems & Algorithms: In-Memory BM25 Lexical Scoring, Damerau-Levenshtein Typo Distance, Scrypt KDF
DevOps & Tooling: GitHub Actions CI/CD, CodeQL Advanced Security, Vercel, Docker, Git

FEATURED PRODUCTION ARCHITECTURES

1. SearchHub / SearchEmbed: 14KB zero-dependency in-memory search widget delivering sub-2ms query responses without cloud database roundtrips. Live at santoshkumarvvv.github.io.
2. Dev Showcase: Multi-platform Flutter engine built with Clean Architecture & Riverpod.
3. Scrypt KDF Auth: Cryptographic key derivation resisting GPU/ASIC brute-force attacks.
